**Please register with Stuart Glynn  
on 0419 136 644 or  
[SGlynn@ARTC.com.au](mailto:SGlynn@ARTC.com.au)**

In December 2018 the Adelaide Rail Operations Control Centre was relocated from North Terrace to Dry Creek.

This complex achievement saw the culmination of nearly three years of intricate work since the implementation of the initial feasibility studies.

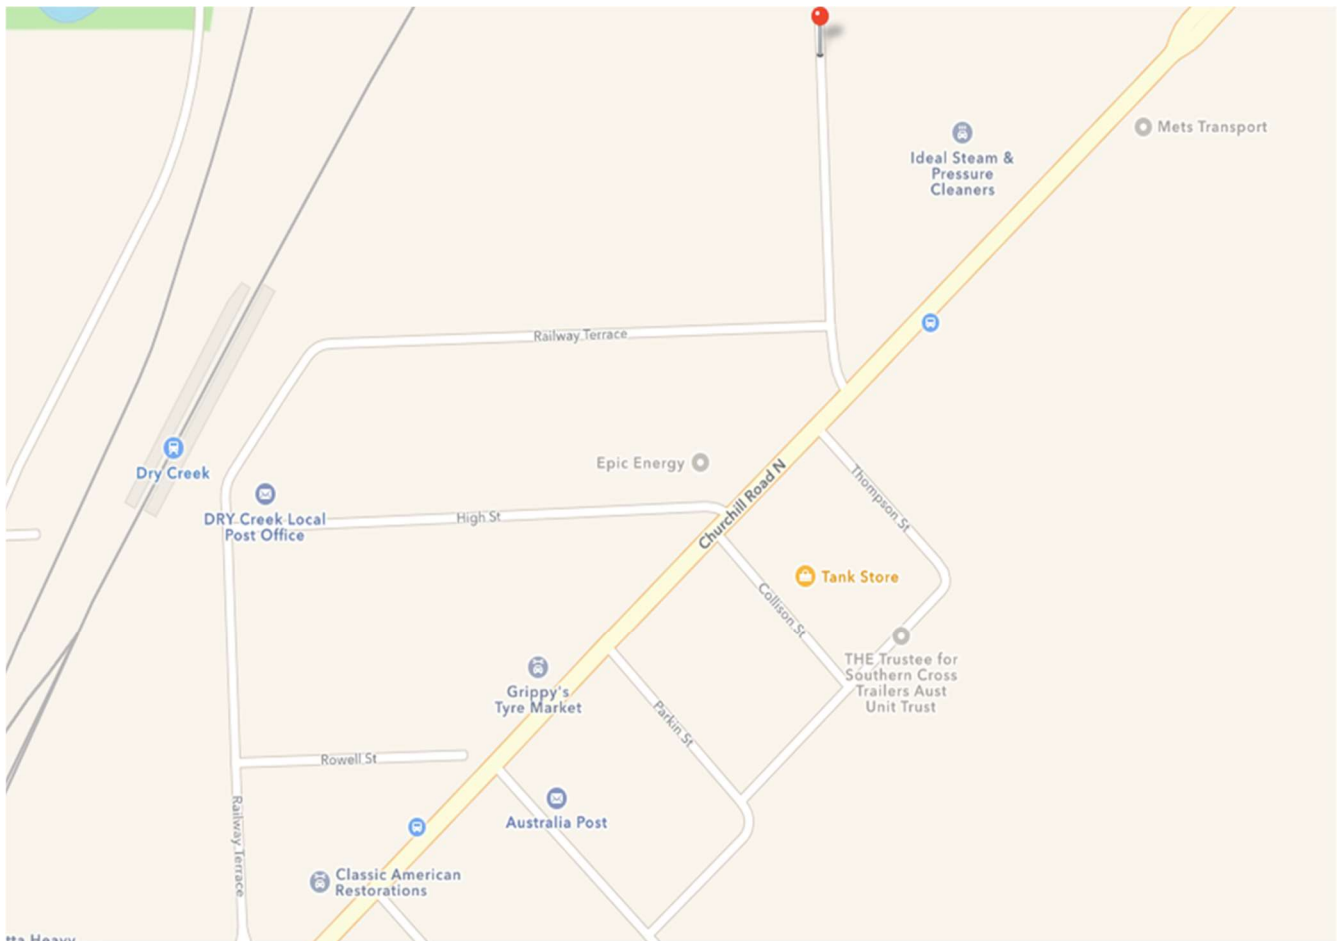

These studies were followed by 18 months of planning, construction and fit out works that required a multitude of system and communications testing to comply with strict safety protocols.

The new Centre places Adelaide at the forefront of the latest technology and its approach to managing the train network.
