

INSIGHT INTO TRACK ENGINEERING COURSE 2021

Perth, WA
21st June 2021

The Railway Technical Society of Australasia (RTSA) is seeking expressions of interest for attendance at the Insight Into Track Engineering Course 2021.

Course Description

This one-day course will be held in Perth on Monday 21st June, just prior to CORE 2021. It will provide an insight to the technology, processes and principles that are used by railway track engineers. It is designed for those required to liaise with track engineers, assist with the design of railway track, coordinate with track engineering projects and/or maintenance activities and provide an understanding of the interface between track and other railway systems. To encourage further study and the attainment of competencies related to Track Engineering.

Course Aims

- To provide an overview of rail track engineering disciplines.
- To provide an understanding of the interaction between track engineering and other railway disciplines.
- To provide an understanding of the safety requirements when working on or near railway track.
- To provide an understanding of the legal requirements when working on or near railway track and the role of the Regulator

Course Fee

(TBC once registration opens)

CORE2021 attendees:	\$900 AUD
RTSA Members:	\$900 AUD
Non-members:	\$1100 AUD
