at 9am - 11am**

**FREE ENTRY**

New South Wales Local Network

## Sydney Metro Train Facility (South) Site Tour hosted by IET NSW Network and RTSA

**Guest speakers: SystemsConnect  
and Sydney Metro**

Sydney Metro's identity is stronger for the unique conditions of centres and communities through which it passes. This local character is to be embraced through distinctive station architecture and public domain that is well integrated with the inherited urban fabric of existing places. It is intended that the trains facility and dive structure respond to their immediate context in a sympathetic way. The urban/community impact to streetscape neighborhood is a primary consideration.

Delivering an enduring and sustainable legacy for Sydney. Sydney Metro is a positive legacy for future generations. A high standard of design across the corridor, stations and station precincts, that sets a new benchmark, is vital to ensuring the longevity of the Metro system, its enduring contribution to civic life and an ability to adapt to a changing city overtime. New built elements are to reflect the Sydney Metro identity, being modern, sophisticated and of its place and time. Screening and planting has been included where possible to minimise visual impact. The materials and construction used will have the necessary qualities to be serviceable, and enduring enough to meet the required "Design Life". Care in the detailing and finishing will ensure the buildings continue to be safe, clean and present well with minimal maintenance. Service facilities by nature are required to be robust. Material choice will reflect the need to be 'fit for purpose'.

Venue

**Sydney Steel Road Entry Gate 2,  
off Edinburgh Road Marrickville, Site sheds,  
toilet facilities and sign on incompound**
